Face Recognition solutions

Source Image	Suspect Image	Score	D1	D2	Identity
		100	99.9960	100	
		100	99.9991	100	
		99.9999	99.9982	99.9999	
		99.9999	100	99.9999	
		99.99879	87.49931	99.99879	

Constant face Acquisition System (CFASII) provides excellent Automatic Face Recognition for both Real-Time and Post Processing environments.

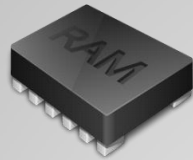

It has easy to use graphic user interface with full web interaction and Email based Alert system. It allows integration with Ex-Sight's VACAM INTRUSION and VACAM SD cameras. It also allows integration with fingerprint and Iris recognition systems

CFASII provides 1:1, 1:N and N:N engine is embedded into CFASII Desktop Application, allowing face enrollment and matching capabilities from different video or stills sources. CFASII enhanced web search system with Real Time Suspect Detection features.

CFASII, Perfect Investigation Tool based on face image match/search, identity management tools and remote alerts.

It allows image storage / restore based on detection events, and remote image enquiries.

Constant face Acquisition System

- Task Reporting
- Entry Counting
- Group Detection
- Multi Modal Biometrics
- Various Interfaces
- Minimum Requirements

Face Access Control

Recognition

- 1:1, 1:N, Face, Finger, Face Card, Face Liveness Test, Face Ageing, Dual Algorithms support

Video Sources

- IP (AXIS, VACAM, ASONI and many more), Video Sources, USB (Webcam), Analog (through Video grabber)

Access Control

- Time Zones, Users, Counting, Group Access, Task reporting, Door Break Alarm

Network

- Embedded web server, Flexible Database location, Replication support, Remote view, Web Reporting

Localization

- XML TEXT file translation

Voice Alerts

- Supported

DIO

- USB Relay Card or IP Camera DIO (VACAM only)

Licensing

- Per door
