BioMaster

CENTRALIZED MANAGEMENT

Application for connecting multiple local BioSurveillance or BioMarketing systems, permitting centralized management.

BioGenerator

SYNTHETIC VIEW GENERATION

BioGenerator provides artificial rotations of an individual's face based on an initial image, thereby improving recognition efficiency.

BioCom

INTEGRATION WITH APPLICATIONS

The BioCom communications module facilitates the task of integrating our products with specific applications.

BioDatabase

IMAGE IMPORTATION

BioDatabase is a management tool that facilitates the automatic incorporation of a large number of subjects in the database.

ALERTS ON MOBILE DEVICES

BioAlarm is an external visualization module that enables the remote reception of alarms on Apple / Android mobile devices.

BioEnrollment

AUTOMATIC ENROLLMENT

BioEnrollment permits the incorporation into a database of all the subjects who pass in front of a camera, automatically and without any collaboration on the part of the subject.
