

Stop lifting system

Traditional ways of reviewing surveillance video are time-consuming, tedious and costly. This innovative system syncs your stores' POS with your CCTV video and organizes suspicious, targeted transactions in a web viewer for super fast navigation. It automates your loss prevention efforts with millisecond-accuracy. There are different type of loss that can occur in a store related to mistakes or intentional fraud such as:

Sweethearting lift: cashiers giving away products to friends family members other fellow employees by covering the bar code while scanning for instance

Self-Checkout Loss: avoid that people walk away after a self checkout without paying for all goods

Refund/Return Fraud: it checks if a customer is really present during a refund or a return avoid fraud from cashiers.
